PROJECTS

SayHealth | Android Developer

GitHub link:

An app built to improve the emergency medical services of India. The app provides a 24-7 ambulance ordering facility with live tracking.
Built using JAVA, Firebase, and Google APIs

Art Gallery | Full Stack Developer

GitHub link:

We built this Art Gallery Shopping website in order to learn more about backend development and databases. Here you have the option to buy Art pieces directly from the website.
Built using PHP and MySQL

BU Check | Front-end Developer

GitHub link:

A website built for the Bennett University where the user could send queries and also check out all about the college campus with cool animations and styles.
Built using HTML, CSS, and JavaScript

CodeDen & Photochop | React Developer

GitHub link:

Well Built clones for famous development website named Code pen and the photo editing software Adobe Photoshop
Built using React.js, Node and CSS
  ➢ **A lot more projects on my GitHub account...**
